

**FSB-6201**      **TE Buffer 1x**

**Size:**                    1 Liter

**Concentration:**      1 X

**Form:**                    Liquid

**Description:**        This 1X TE Buffer is used to resuspend the final purified plasmid pellet and contains very low EDTA, so it is compatible with sequencing and other enzymatic applications.

**Composition:**        10 mM Tris-HCl (pH 8.0)  
0.1 mM EDTA

**Storage:**              Store at room temperature.

**For Research Use Only**
